Velmora Advisory – Service Description (draft v7 final NEW)

Velmora Advisory is a consulting company which supports companies in the areas of Finance, Risk and Transformation and offers a broad range of services, reaching from support in project management through risk analyses and the review of control structures up to process optimisation as well as the set-up and further development of management reporting, whereby we work both on the level of management and together with the business functions and the implementation teams.

Due to our many years of experience in the regulatory environment we are able to implement even complex requirements in a pragmatic way without large teams of consultants being necessary, which is relevant in particular for mid-sized companies and growing organisations that have to meet increasing regulatory and operational demands with limited internal capacity and that often find unclear processes, controls and reporting structures which make well-founded decision-making more difficult.

For this reason, in addition to the content work, we also take over the coordination and communication between the parties involved and accompany transformation projects from planning to implementation. Our approach is always practical and oriented towards the actual circumstances of the respective company, so that results are not only developed conceptually but can actually be implemented, and at the same time the communication towards stakeholders is improved while risks are identified at an early stage and suitable measures are derived.

Our services include among others: project management (PMO, planning, steering, reporting), risk analyses, control reviews, process reviews, process optimisation, management reporting, board reporting, stakeholder reporting, transformation support, coordination, communication, implementation support, as well as further services on request. Our clients include financial services firms, mid-sized companies and growing organisations as well as teams with complex transformation or reporting needs.

What distinguishes us is senior hands-on support, an understanding of finance and regulatory topics, clear communication between stakeholders and a pragmatic execution without oversized project teams. If you are interested in our services or have any questions, please do not hesitate to contact us at any time, we would be pleased to arrange an introductory call with you.
